Question 1.01

TOTAL POINTS 1

---

1. Which type of modeling has the following characteristics?

1 / 1 point

- answers the question "How X is related to Y?"

- has small sample sizes and few variables

- is assessed using p-values and confidence intervals

- ⦿ explanatory modeling

- ○ predictive modeling

✓ **Correct**

In explanatory modeling, the goal is answer the question, "How is X related to Y?" You typically have small sample sizes and few variables, and you assess the model using p-values and confidence intervals.
